C#/VB.Net, .NET Framework (versions 1.0 – 4.0), ASP.NET, MVC Framework, JavaScript, jQuery, AJAX, XHTML, SQL, LINQ, ADO.NET Entity Framework, XML Web Services, WCF services, Classic ASP, (and a long time ago: Visual Basic 6, JSP, Java, C, C++, and BASIC).

Software

Visual Studio 2003 – 2010, IIS 5 – 7, MS SQL Server 2000 – 2008, Team Foundation Server, RedGate SQL/Data Compare, Eclipse, Visual Source Safe 6, SourceGear Vault, Microsoft Office, Adobe Fireworks & Photoshop, Vi

Professional Experience

11/2007 – Present

Senior .Net Developer

Harte-Hanks

Yardley, PA

As the principal web developer, design and develop web-based marketing solutions for clients in varying verticals, including major pharmaceutical and automotive firms. Projects include websites targeting drug promotion, direct marketing campaign management portals, Facebook applications, production demo applications, as well as internal applications. Employing 3.5 and 4.0 .NET Frameworks with C# and heavy use of MVC Framework, AJAX, jQuery, LINQ and Entity Framework, with SQL Server 2008 back-end, with great focus on cross-browser compatibility, while mentoring junior and mid-level developers.

05/2006 – 11/2007

Senior Software Developer

Philadelphia Insurance Companies

Bala Cynwyd, PA

Designed, developed and maintained Path.NET – company’s flagship web application for prospecting, underwriting and maintaining insurance policies. Lead teams of junior and senior-level developers on new functionality building projects and defect resolution tasks. Also responsible for gathering requirements from business users, translating them into technical specifications and distributing work items within the group. Utilized C#.NET 2.0 Framework, XML Web Services, XML, JavaScript (including AJAX), SQL Server 2005.

02/2002 – 03/2006

Senior Software Engineer

TruMark Financial Credit Union

Trevoze, PA

Built Internet and Intranet web-based tools, as well as Windows desktop applications. Involved in all aspects of the project life cycle: requirements gathering, analysis, design, implementation, deployment and maintenance. Employed VB.NET, C#.NET, ASP.NET, Classic ASP, VB 6, XML Web Services, and .NET Remoting, COM/DCOM, SQL, XML, JavaScript, HTML, Flash, and RepGen. Major projects included on-line Home Banking, E-Statements, Sales Tracker, and Loan Application systems, as well as the redesign of the company’s official website.

Mentored, and responsible for the success of, a software support engineer. This includes task and project assignments, and training.

06/2001 – 02/2002

Application Developer

SAP America

Newtown Square, PA

Designed and developed several web-based management tools for the Intranet. Implemented the systems with Java, JSP, JDBC, and ASP in a Windows NT

environment. Set up, maintained, and utilized the following applications: Apache and IIS web servers, Tomcat servlet engine, MySQL, MS SQL Server, and MS Access. Prepared specification and design documents for large software projects.

09/1999 – 03/2000

Software Engineer

SmithKline Beecham's R&D Center
Upper Merion, PA

Built a web-based system, located on the company's intranet, which manages and maintains a database of web-accessible research resources, used by researchers and medical staff for development of pharmaceutical products. Project included the use of Java Servlets and JSP with an Oracle back end. Also employed were HTML, JavaScript, CSS, SQL, and Perl, while working in UNIX and NT environments.

09/1998 – 08/1999

Software Developer

Payroll Data Systems
Philadelphia, PA

Designed, developed, and tested applications used to process payroll for mid-sized businesses. Developed the system using Visual C++, in a Windows NT environment, based on the specifications provided by the management and other system users. Other tasks included designing and maintaining the company website, providing technical support to computer users in the company and assisting with network maintenance.

09/1997 – 06/1998

MIS Assistant

Pep Boys Store Support Center
Philadelphia, PA

Provided technical support to Pep Boys stores and service centers in U.S. and Puerto Rico for company software used to create work and purchase orders. Tested applications and reported bugs directly to developers. Updated Sybase database tables to keep the customer and product information up to date. Interacted with customers and developers on a daily basis.

Education

Drexel University, Philadelphia, PA
Bachelor of Science in Computer Science
Focused on Software Engineering, Human-Computer Interaction, and Operating Systems
Graduation Date, June 2001

Strayer University, Philadelphia, PA
Master of Business Administration
Concentration in Management Information Systems

Certifications

MCP, MCTS
